

NAGOTHULA DHANUSH

Anantapur, Andhra Pradesh — +91 6281268312 — dhanushchoudhary3@gmail.com

LinkedIn — Portfolio — GitHub

Summary

Computer Science and Engineering (AI & ML) graduate with hands-on experience in Java, Python, SQL, REST APIs, backend development, debugging, and Software Development Life Cycle (SDLC). Strong foundation in Linux, TCP/IP, DNS, Object-Oriented Programming, and technical troubleshooting through software projects and internship experience. Passionate about resolving customer issues, supporting cloud-based applications, and delivering reliable technical solutions in a fast-paced product environment.

Experience

Java Programming Intern

Jul 2025 – Sep 2025

Istop.ai

- Developed Java-based backend applications using Core Java, Spring Boot, SQL, REST APIs, and Software Development Life Cycle (SDLC) practices.
- Built CRUD-based backend modules with relational database connectivity, exception handling, debugging, software validation, and technical documentation.
- Investigated application issues through root cause analysis, troubleshooting, performance optimization, and code reviews to improve application reliability.
- Collaborated using Git version control while participating in testing, debugging, requirement analysis, software maintenance, and technical support activities.

Education

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence & Machine Learning) 2022–2026

Kalasalingam Academy of Research and Education

CGPA: 8.04/10.0

Intermediate (MPC)

2020–2022

Sri Chaitanya Junior College, Kurnool

90.6%

Secondary School Certificate

2020

Board of Secondary Education, Andhra Pradesh

93.1%

Skills

Programming Languages: Java, Python

Operating Systems: Linux

Networking: TCP/IP, DNS, HTTP/HTTPS

Backend Technologies: Core Java, Spring Boot, REST APIs

Databases: Structured Query Language (SQL), MySQL

Cloud Platforms: Oracle Cloud Infrastructure

Version Control & Tools: Git, GitHub, Visual Studio Code

Web Technologies: HTML, CSS

Projects

Smart Vehicle Scanner: Automatic License Plate Recognition (Python, Flask, EasyOCR)

- Developed a Flask-based backend application using REST APIs and OCR to automate Indian vehicle license plate recognition, improving data processing efficiency and application reliability.
- Applied debugging, technical troubleshooting, error handling, data validation, performance optimization, Linux-based development, technical documentation, and scalable backend workflow design.
- Investigated OCR failures through root cause analysis, validated application outputs, documented issue resolution steps, and improved system reliability using structured testing and software validation practices.

Emotion Detection Using Sentiment Analysis for Twitter Data (Python, SQL, Scikit-learn)

- Built a sentiment analysis pipeline processing over 10,000 Twitter records and achieved approximately 99.68% classification accuracy through feature engineering and model evaluation.
- Utilized SQL, debugging, structured data processing, analytical problem-solving, workflow documentation, performance optimization, and scalable data processing techniques to deliver reliable machine learning solutions.
- Performed technical troubleshooting, root cause analysis, software validation, and performance analysis during model evaluation while documenting findings to improve application quality and maintainability.

Certifications

- **Java Programming:** Istop.ai Internship, GeeksforGeeks, CodeChef
- **Database Management Systems (SQL):** CodeChef
- **Oracle Cloud Infrastructure Generative AI Professional:** Oracle
- **Data Analytics:** Microsoft, Deloitte, Cisco Networking Academy
